

ABSTRACTS & SCIENTIFIC PROGRAM

The 3rd Annual Meeting of the FA1106-COST Action "*QualityFruit*" will take place at Chania, Maich (Crete), from September 21th to 24th 2013. The program consisted in a few invited lectures and some selected oral presentations. We especially encouraged young researchers to talk about their results. The meeting is open to non-members of the COST action.

OPENING LECTURE

The epic of postharvest physiology: Lessons and challenges for the future

Jean-Claude PECH

**Institut National Polytechnique
Toulouse
France**

INVITED SPEAKERS

Deciphering the genetic control of tomato fruit quality in the resequencing era

Mathilde CAUSSE

**INRA
Avignon
France**

Phytochromes act as a time-keeper during tomato fruit development and ripening

Yellamaraju SREELAKSHMI

**University of Hyderabad
India**

Transcriptomic analysis of late stages grapevine berry ripening indicates induction of ethylene signaling and flavor pathways in the skin

Grant CRAMER

**University of Nevada
Reno
USA**

Molecular dissection of parthenocarpic fruit development in tomato using a comprehensive Micro-Tom mutant resources.

Hiroshi EZURA

**University Of Tsukuba
Tsukuba
Japan**

Victoriano VALPUESTA

**University of Malaga
Spain**

Relating water stress to grape berry skin mechanical properties and cell wall composition and expression of remodeling genes

Sara AMANCIO

Instituto Superior de Agronomia, Lisboa, Portugal

Genetic and genome-wide transcriptome studies underlying vitamin C content in tomato fruits

Miguel Angel BOTTELLA

University of Malaga, Spain

*Molecular characterization of flavonoid biosynthesis in grapes (*Vitis vinifera* L. cv. 'Syrah') under drought conditions*

Vasileios FOTOPOULOS

Cyprus University of Technology, Lemesos, Cyprus
